

Drillside GeoSolutions by *MAJOR Drilling*

WHAT WE DO

Drillside GeoSolutions by Major Drilling is a new innovation solutions suite of services that is revolutionizing the use of artificial intelligence and data technologies to deliver orebody knowledge like never before. We're combining advanced drilling, borehole surveying and core logging at the drillside bringing greater downstream benefits for all.

Drilling has always been about finding solutions. We are ever committed to our drillside expertise, emphasizing our hands-on approach and technical proficiency. Now, with DGI Geoscience and KORE GeoSystems, we're pleased to advance a new era of providing real-time, innovative solutions to solidify our role as the go-to experts in the exploration drilling industry.

Drillside GeoSolutions

TRAILBLAZER TECHNOLOGY

- Our **Rock5** drillside data analytics system improves safety and productivity
- The **AquaLink** remote water pump system conserves water and optimized flow control
- **SafeGrip** automated rod handling technology advances drill safety and efficiency
- Ask about our **MTB** portal and more ongoing innovations

DGI/KORE

- **DGI** borehole data acquisition services now available drillside
- Orebody imaging available earlier with complete, accurate detail
- **KORE** automation increases the speed of core logging
- Increase productivity, consistency with enhanced data insights
