TRAILBLAZER

SAFE GRIP

Introduction

TrailBlazer SafeGrip

Enhanced Safety while maintaining efficiency in drilling operations.

The SafeGrip is an innovative hands-free rod handling solution designed to enhance safety and efficiency in drilling operations, exclusive to Major Drilling.

SafeGrip Key Features

MAJOR
Drilling

Automation Capabilities

180° versatility on seven different axes

Enhanced Safety

Compatible with all rod sizes

Ability to handle uneven terrain

Adaptable to various types of exploration drills

Increased Drilling Efficiency

Carrying weight capacity of 136 kg

Who Benefits from SafeGrip?

SafeGrip is an innovative hands-free rod handling solution designed to enhance safety and efficiency in drilling operations.

Our Crews

The SafeGrip is not only **enhancing safety**, but is **reducing the risk of injury** and **decreasing the physical demand** on drilling crews. With its hands-free solution, SafeGrip is making it safer for crews everywhere both during rod handling operations and core extraction procedures.

Our Clients

This innovative solution meets **no hands on steel requirements**, keeping crews safe and reducing lost time to injuries. With its automation capabilities, SafeGrip aligns with the client's push towards **automation and remote work setup**.

The Drilling Industry

We partner with leading mining companies to develop **scalable solutions** adapted to meet industry requirements. The SafeGrip brings **a new standard in versatility**, leading the industry in developing adaptable solutions to various drill makes and models.

Trailblazer Solutions Suite

These other offerings are designed to enhance the efficiency, safety, and sustainability of drilling projects.

MAJOR
Drilling

Rock5

Our advanced Rock5 technology optimizes drill performance and safety. With adaptability to various drill models, it offers an in-house designed dashboard that tracks drill function pressures, water usage and much more.

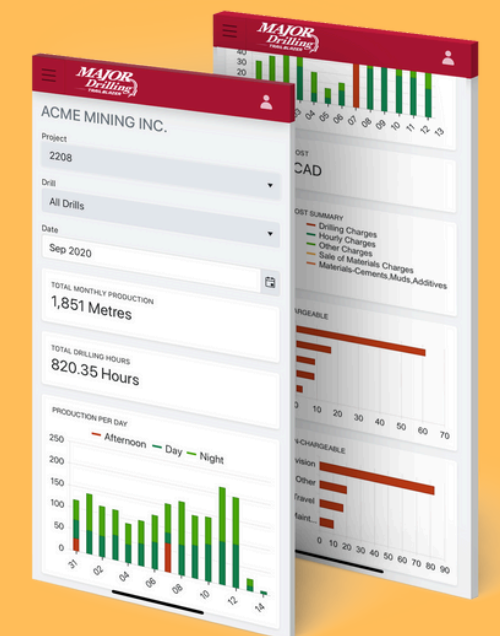

AquaLink

A cutting-edge solution for water management in drilling projects, AquaLink enhances water usage efficiency and sustainability.

MTB Mobile + Portal

MTB Mobile captures daily drill reports electronically from the field and submits them directly into our Time & Billing system. Our Portal then provides access to these reports in real-time.

Global Capabilities

Major Drilling is a leading **specialized drilling** company with a global presence, delivering exceptional results on the toughest sites. Leveraging our extensive experience, modern diversified drilling fleet, and commitment to **safety**, we **partner** with customers **worldwide**.

Our services include surface and underground drilling, directional drilling, dewatering, and more, ensuring quality, safety, and outstanding results. With branch locations across North and South America, Europe, Africa, Asia, and Australia, Major Drilling is equipped to meet the unique needs of every project.
